

DCDC

DC-to-DC Converter

Transtech's DC12-9-0.5 is a very robust low noise DC-DC Converter used to supply any 9V loads, like radio, audio amplifier, etc..

Its output is entirely protected against short-circuit and overload. This converter has been specially designed to meet transit industry standards using commonly used connectors. The converter is also protected against overvoltage situations.

HIGHLIGHTS

- Compact enclosure
- Entirely protected against overvoltage and overcurrent
- Specially designed for audio applications in the bus industry
- Resistant to water, snow, salt, soaps, oils, etc.

OVERALL DIMENSIONS

Length 3,65" x Height 1,52" x Depth 1,22"

MODELS & FEATURES

Part Number	DC12-9-0.5
Operating Voltage	12V
Load Voltage	9V
Load Current	0,5A
Power Output	6W
Number of Channels	1

X = Included, O = Optional, F = Factory selectable
