

BEDMS

Body End Door Manual Sign

The Body End Door Manual Sign (BEDMS) is a slim, high-intensity LED display, showing instructions to the passenger on how to open the doors. It can display two different messages selected by input signals.

The LED backlighting is designed to prevent the failure of one LED from affecting the light intensity.

BEDMS2 shown

HIGHLIGHTS

- Ultra-thin profile
- Energy saver
- Message selector inputs
- Messages can be customized
- High resistance to scratches and shock
- Very high contrast ratio
