

DOB-DU

120V Duplex Outlet Box with USB Ports Option

Transtech DOB-DU series is specially designed for railroad applications. A WAGO connector is provided at the back of unit for fast installation.

DOB2.0-DU includes a voltage surge suppressor and a 2A auto-resettable breaker for each outlet. In case of an overload, the circuit will automatically open. DOB15-DU includes a voltage surge suppressor with 15A maximum current capacity. When the overload situation disappears, the internal circuit breaker resets automatically. The current limit (e.g. 2A) is factory customisable.

Two fully protected USB ports (Type-A, Type-C or one of each).

DOB2.0-DU shown

HIGHLIGHTS

- Duplex 120V_{AC} outlets
- Surge suppression to protect passenger's apparatus
- Overload status indicator on the front panel
- Multiple orientation options
