

DOBG

120V Duplex Outlet Box with GFCI

Transtech's Duplex Outlet Box with GFCI (Ground fault circuit interrupter) (DOBG) series is specially designed for railroad applications. All outlets are compliant with UL943 Class A GFCI and UL498 requirements list.

The outlet of the DOBG is already wired internally. A WAGO is provided at the back of the unit for fast installation.

DOBG20-V shown

HIGHLIGHTS

- Ground fault interrupter circuit integrated
- Duplex 120V_{AC} outlets
- Ground fault status indicator on the front panel
- Multiple orientation options

MODELS & FEATURES

Part Number Base	DOBG20-H	DOBG20-V
Operating Voltage	120V _{AC}	120V _{AC}
Maximum Current Output	20A	20A
Limited Current	-	-
Mount Orientation	Horizontal	Vertical
Length X Height X Depth		
5.55" X 2.28" X 2.22"	X	X

X = Included, O = Optional, F = Factory selectable
